Voice Agent Quality Assurance Report

Generated: March 02, 2026

This report presents a structured review and validation of the auto-generated QA findings for the Pretty Good AI Voice Agent test scenarios. Each issue has been reviewed for logical accuracy, clarity, and operational relevance. Severity levels reflect potential impact on patient safety, experience, and operational reliability.

01 – Schedule Appointment

Repeated Doctor Name and Time

Severity: Medium

Timestamp: [02:09]

- Observed Behavior:

  Doctor name and appointment time were repeated in a confusing structure.

- Assessment:

  Valid finding. Repetition reduces conversational clarity and may create uncertainty in booking confirmation.

- Recommended Correction:

  State the appointment once clearly and concisely.

Incomplete Sentence

Severity: Medium

Timestamp: [02:33]

- Observed Behavior:

  Fragmented response offering options without full context.

- Assessment:

  Valid finding. Incomplete phrasing can degrade professionalism and comprehension.

- Recommended Correction:

  Provide complete structured options before asking for preference.

Lack of Explicit Booking Confirmation

Severity: High

Timestamp: [03:38]

- Observed Behavior:

  No explicit confirmation after patient agreed to time slot.

- Assessment:

  Valid and high impact. Confirmation is mandatory in scheduling workflows.
- Recommended Correction:

  Confirm date, time, doctor, and next steps clearly.

Inconsistent Doctor Name Spelling

Severity: Low

Timestamp: [03:38–03:43]

- Observed Behavior:

  Doctor name pronounced inconsistently.
- Assessment:

  Valid but low severity. Impacts professionalism rather than safety.
- Recommended Correction:

  Maintain consistent naming across conversation.

02 – Reschedule Appointment

Failure to Address Specific Doctor Request

Severity: High

Timestamp: [03:12]

- Observed Behavior:

  Agent repeatedly offered other providers instead of requested doctor.
- Assessment:

  Valid and high severity. Indicates failure of contextual preference tracking.
- Recommended Correction:

  Check requested doctor availability or escalate appropriately.

Repeated Unwanted Options
Severity: Medium

Timestamp: [05:33]

- Observed Behavior:

  Continued offering alternatives despite clear preference.
- Assessment:

  Valid finding. Creates frustration loop.
- Recommended Correction:

  Acknowledge preference before offering alternatives.

Failure to Execute Transfer
Severity: Medium

Timestamp: [07:16]

- Observed Behavior:

  Transfer to support team offered but not executed.
- Assessment:

  Valid and operationally significant.
- Recommended Correction:

  Confirm and complete transfer action.

03 – Medication Refill
No material issues identified during review.

04 – Office Hours Inquiry

Incomplete Office Hours Information
Severity: High

Timestamp: [00:52]

- Observed Behavior:

Only partial schedule provided.

- Assessment:

  Valid and significant. Incomplete business hours cause misinformation.

- Recommended Correction:

  Provide full weekly schedule clearly.

Ignored Weekend Question

Severity: Critical

Timestamp: [01:01–01:06]

- Observed Behavior:

  Direct weekend question unanswered.

- Assessment:

  Valid and critical. Direct question avoidance reduces trust.

- Recommended Correction:

  Answer clearly whether weekends are open or closed.

No Summary of Key Information

Severity: Medium

Timestamp: [01:53]

- Observed Behavior:

  No recap before call closure.

- Assessment:

  Valid improvement opportunity.

- Recommended Correction:

  Summarize hours and address before ending call.

05 – Insurance Verification

Abrupt Call Termination

Severity: Critical

Timestamp: [04:57]

- Observed Behavior:

  Call ended without answering insurance network question.

- Assessment:

  Valid and critical. Insurance inquiries require resolution or escalation.

- Recommended Correction:

  Provide answer or transfer before closing.

06 – Sunday Appointment Trap

Incorrect Sunday Handling

Severity: High

Timestamp: [01:35]

- Observed Behavior:

  Suggested alternate Sundays despite office being closed.

- Assessment:

  Valid logical inconsistency.

- Recommended Correction:

  Clearly state Sunday unavailability immediately.

Failure to Confirm Saturday Booking

Severity: Critical

Timestamp: [03:06]

- Observed Behavior:

  No booking confirmation after agreement.

- Assessment:

  Valid and high operational risk.
- Recommended Correction:

  Confirm booking details explicitly.

07 – Cancel Appointment

Incomplete Cancellation Response

Severity: High

Timestamp: [01:11]

- Observed Behavior:

  Fragmented clarification request.
- Assessment:

  Valid finding.
- Recommended Correction:

  Acknowledge cancellation and request required verification.

No Cancellation Confirmation

Severity: Critical

Timestamp: [03:30]

- Observed Behavior:

  Did not confirm appointment cancellation.
- Assessment:

  Valid and critical workflow gap.
- Recommended Correction:

  Confirm cancellation status and next steps.

Ignored Cancellation Fee Question

Severity: Medium

Timestamp: [03:33]

- Observed Behavior:

  Fee inquiry not answered.

- Assessment:

  Valid informational gap.

- Recommended Correction:

  Provide policy or escalate appropriately.

08 – Confused Patient

No material issues identified during review.

09 – Urgent Symptoms

Insufficient Urgent Care Escalation

Severity: Critical

Timestamp: [01:27]

- Observed Behavior:

  Advised callback rather than urgent care guidance.

- Assessment:

  Valid and safety-critical deficiency.

- Recommended Correction:

  Advise immediate medical attention when symptoms suggest risk.

10 – New Patient

Incomplete Question Structure

Severity: Medium

Timestamp: [00:43]

- Observed Behavior:

  Fragmented sentence.
- Assessment:

  Valid but moderate impact.
- Recommended Correction:

  Provide complete contextual question.

Unanswered Wait Time Question

Severity: High

Timestamp: [01:44]

- Observed Behavior:

  Repeated statement instead of answering wait time.
- Assessment:

  Valid high-impact gap.
- Recommended Correction:

  Provide estimated wait time.

Abrupt Call Ending

Severity: Medium

Timestamp: [05:21]

- Observed Behavior:

  No courteous confirmation before ending.
- Assessment:

  Valid professionalism issue.
- Recommended Correction:

  Confirm booking and close politely.

11 – Interruptions Test

Incomplete Rescheduling Response

Severity: High

Timestamp: [02:27]

- Observed Behavior:

  Sentence fragment with unclear options.
- Assessment:

  Valid and context-loss indicator.
- Recommended Correction:

  Provide structured options.

12 – Medical Records Request

Incomplete Record Transfer Explanation

Severity: High

Timestamp: [01:00]

- Observed Behavior:

  Transfer process explanation incomplete.
- Assessment:

  Valid clarity issue.
- Recommended Correction:

  Explain required steps clearly.

Electronic Transfer Not Addressed

Severity: Medium

Timestamp: [01:49]

- Observed Behavior:

  Did not answer electronic delivery question.

- Assessment:

  Valid informational omission.
- Recommended Correction:

  Clarify availability of electronic transfer.

13 – Difficult Patient

Doctor Preference Ignored

Severity: High

Timestamp: [02:02]

- Observed Behavior:

  Repeatedly offered other providers.
- Assessment:

  Valid context-tracking failure.
- Recommended Correction:

  Check requested provider availability.

Medicare Inquiry Not Answered

Severity: High

Timestamp: [02:55]

- Observed Behavior:

  Medicare question avoided.
- Assessment:

  Valid and financially relevant gap.
- Recommended Correction:

  Confirm coverage or escalate.
